

1. Below is a list of employees registered for an event organised by Greek Mythology Inc.

Name	Gender	Age
Poseidon	M	23
Hera	F	18
Apollo	M	20
Athena	F	35
Demeter	F	50

Create an Employee class that represent an Employee. Use Java stream to filter and print all female employees aged 21 and above. Provide two alternative solutions.

2. Use a parallel stream to count number of prime numbers between 1 and 50. Write your program in such a way so that you can display which worker thread processes which numbers.
